

**CONSULTATION ON CANCER DIRECTIONS FROM THE DISEASE CONTROL PRIORITIES NETWORK
Opportunities in Low- and Middle-Income Countries**

November 20, 2013 Mount Nelson Hotel, Cape Town, South Africa

Objectives:

- Review key messages from *Disease Control Priorities* on cancer control in low- and middle-income countries.
- Discuss the evidence base for cost-effective, high impact cancer prevention, treatment, cancer health care systems and policies.
- Discuss integration of evidence-based cancer control into Universal Healthcare Coverage/National Cancer Plans
- Discuss key implications for research funding and strategies, particularly collaborative research efforts led by BRICS+ countries and lead US/UK/European agencies.
- ***Define an “avoidable cancer mortality” scenario for 2030, based on analytic inputs.***

NOTE: The *Chatham House Rule* for encouraging openness in discussion will apply during this Consultation. In short, no information or remarks may be attributed to any individual at the Consultation by the participants or organizers. Please see more information on the Chatham House Rule at www.chathamhouse.org/about-us/chathamhouserule.
