

**Olufunmilayo I. Olopade, MD, FACP, OON**  
Walter L. Palmer Distinguished Service Professor of Medicine  
Director, Center for Clinical Cancer Genetics and Global Health  
University of Chicago

## “Leapfrogging Global Breast Cancer Research”

An international leader in cancer genetics, Dr. Olopade seeks to identify those at risk for breast and ovarian cancer earlier in life, intervene aggressively, reduce risk, and thereby more effectively control cancer. She studies familial forms of cancers, molecular mechanisms of tumor progression in high-risk individuals as well as genetic and epigenetic factors contributing to disparities in cancer outcomes in diverse populations. Her current laboratory research is focused on using whole genome technologies and bioinformatics to develop innovative approaches to reduce global disparities in cancer outcomes.
