

# Washington Global Health ALLIANCE

*Discovery Series*

**James Blanchard, MD, MPH, PhD**  
Professor, Departments of Community Health Sciences  
and Medical Microbiology  
Director, Centre for Global Public Health  
Faculty of Medicine  
University of Manitoba, Canada

## “Strategies and Tactics for HIV Prevention – Lessons from the Field”

Dr. Blanchard is an epidemiologist and public health specialist focusing on global health. He received an MD from the University of Manitoba and an MPH and PhD in Epidemiology from the Johns Hopkins University. He holds a Canada Research Chair in Epidemiology and Global Public Health. His research focuses on how the characteristics of individuals, communities, and large populations contribute to the local and global distribution of communicable and non-communicable diseases. Over the past 15 years he has also provided leadership to the design and implementation of large public health programs related to HIV/AIDS and maternal, neonatal, and child health in India, other Asian countries, and Africa. He is actively engaged with policy makers and public health leaders to translate scientific knowledge and approaches to improve the effectiveness and efficiency of public health programs, with an emphasis on improving the health of disadvantaged populations. Dr. Blanchard is one of the authors of the Disease Control Priorities, 3rd Edition, led by the UW Department of Global Health.

### Thursday, February 20, 2014

Lecture 4:30 p.m.-5:30 p.m.
